

EDDAS – 1553 Monitor interface

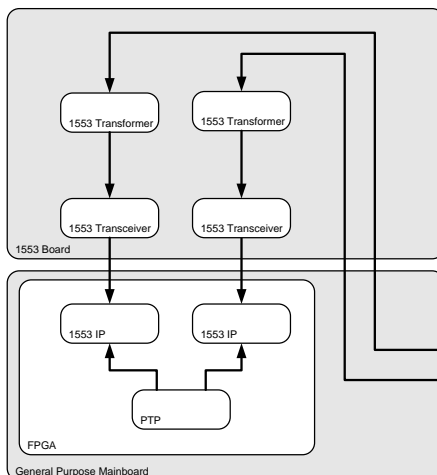

EE 250-5337 1553 monitor interface

Characteristics:

- Rugged design for flight environment.
- 8 (A/B) 1553 monitor channels
- Operation temp.: -40°C to +85°C

Preliminary datasheet

Functionality

- Each channel consists of one A and one B channel.
- Each data packet received can be time stamped.
- The board can be configured with desired channels.
